EXPERIENCE

Goodway Group

Software Engineer

Remote, USA

April 2023 - January 2024

- Key contributor to team-built greenfield product for multi-platform ad data visualization.
 - Designed and developed a customizable activity mapping feature to enhance reporting metrics.
- Created auth0 check for automating new user creation
- Streamlined the onboarding of new advertising platforms by standardizing disparate data sets, ensuring consistency with our established platforms
- Optimized ETL processes, boosting data processing efficiency for current and new data sources

Goodway Group

Associate Software Engineer

Remote, USA

April 2023 - January 2024

- Implemented a Slack integration with existing products to refine error reporting and amplify user feedback
- Crafted a Figma component library to streamline mockups and led the adoption of company branding across tech products, ensuring consistent brand identity
- Rewrote and reconfigured DAGs from Apache Airflow to Amazon Managed Workflows for Apache Airflow

Goodway Group

Tech Operations Engineer

Remote, USA

April 2021 - December 2021

- Successfully addressed over 50 client support tickets, encompassing data discrepancy resolutions, ETL modifications, and implementation of feature enhancements
- Primary liaison for software support, resolving internal and external user issues

Knotel

Full Stack Engineer (Departed due to company wide lay-offs)

New York, NY

November 2019 – February 2020

- Managed/developed company's website built with React, Typescript, and Express with Contentful integrations
- Contributed to core internal API written in Ruby on Rails

Knotel

Marketing Analyst

New York, NY

September 2018 – November 2019

- Developed a React Native app for implementation managers to track the buildout progress of properties
